

Choose **RightAngle™ 4EVERedge™** to **prolong the life of your worksurface and safeguard worker wellness**. This zero-joint edge technology creates a permanent seamless edge, eliminating the ugly glue line that can capture bacteria and dirt.

BEAUTIFUL. DURABLE. CLEANABLE. **@rightangle™ HAS IT ALL.**

Traditional edgebanding uses an adhesive layer to bond the edgeband to the board. Glue joints can collect dirt, chip away, or yellow over time.

- State-of-the art hot air technology creates a permanent superior finish that is virtually invisible. For **rectangular worksurfaces**.
- Hygienically clean. Can be washed with domestic cleaning agents.
- Seam-free edge offers increased aesthetic appeal and is resistant to solvents, dirt, heat and moisture.
- Eco-Friendly! Edge material is made of Polypropylene and is fully recyclable, halogen free, odorless, physiologically harmless and burns clean.
- Impervious to staining and higher UV resistance to fading.
- Features a precision edge for an optimum joint quality with maximum adhesion.

4EVERedge™ eliminates the glue layer, melting the edgeband seamlessly and permanently into the board, creating a flawless moulded look.

With the introduction of this innovative adhesive-free technology, **4EVERedge™** creates a permanent invisible seam, providing the highest degree of resistance to heat and moisture. In a 30 minute steam test, the joints between board & edgebanding and edgebanding & edgebanding withheld ascending temperatures up to 150° C before showing signs of separation.
